## ABSTRACT

This paper provides a sample of a Latex document which conforms, somewhat loosely, to the formatting guidelines for ACM SIG Proceedings, while containing only basic information.

You find more extensive instructions on the usage of this class on https://www.acm.org/publications/proceedings-template-16dec2016. Its developers have tried to include every imaginable sort of "bells and whistles".

To make best use of this sample document, run it through Latex[2] and Bibtex[1].
